

THE BURGHLEY CENTRE

Value:

349k

Client:

The Burghley Centre

Location:

PE10 9EG

Programme:

14 weeks

Sector:

Commercial

Summary:

Removal of the existing waterproofing and installation of a Langley three layer felt system with insulation whilst working over shops in operation

A challenging project where 2200 m² of defective roof coverings over numerous areas had to be stripped and renewed, whilst maintaining waterproofing integrity to ensure that all the shops below could remain in full operation. Once stripped, new plywood upstands and cappings were formed so that the parapet was enclosed and a new warm roof bituminous system was installed.
